

AYRICALIKLI TALİMATLAR

DIŞİŞLERİ BAKANLIĞI
KUZEY KIBRIS TÜRK CUMHURİYETİ
MINISTRY OF FOREIGN AFFAIRS
TURKISH REPUBLIC OF
NORTHERN CYPRUS

PRIVILEGED INSTRUCTIONS

Başbakan Yardımcılığı ve
Dışişleri Bakanlığı
KUZEY KIBRIS TÜRK CUMHURİYETİ

Deputy Prime Ministry and
Ministry of Foreign Affairs
TURKISH REPUBLIC OF NORTHERN CYPRUS

Privileged Instructions

Fundamental Principle:

- The creation of a new United Republic of Cyprus from two founding states

Desired End States:

- A bizonal nation composed of two strong communal governments.
- The codification of a single nation which resides two separate states embracing the unique differences and separate heritages of its peoples.
- A confederation with a central government subservient to the two constituent states and equally representative of the desires of both peoples.
- A nation that enjoys the same level of security as was enjoyed upon the 1960 grant of independence.
- The maintenance of the pre-existing agreements with the Guarantor Powers that ensure the continued security of our two founding states.

Delegation Instructions

Ensure periodic reports, requests for further guidance, or clarifications to the instructions herein are submitted via message to the office of the Foreign Minister.

GENERAL: The Turkish Republic of Northern Cyprus exists because of a history of disenfranchisement by the Greek Cypriot community. Our independence is a direct result of their actions and those of their Greek supporters. A political solution, to be found to the Cyprus problem, is the key factor to protect the rights and interests of the Turkish Cypriots on the Island and to further these rights on a solid foundation. Continuation of the strong and independent existence of the Turkish Cypriots is a must to reach this result and the relations between the TRNC and Türkiye are organized accordingly:

- The Republic of Türkiye has always been the major supporter of our side in negotiations, which have been ongoing for many years. To protect our rights and interests, they have strongly supported the negotiation processes on the Island. The constructive approach demonstrated, and the proposals put forward by Türkiye during the negotiation processes, are the indicators of Türkiye's support for us.
- Türkiye shows its moral support to Turkish Cypriots to protect our rights and interests both at the negotiation table and in the international arena.
- The policies which are proposed to end the unjust isolation, and to make the voices of Turkish Cypriots heard in the international arena, are conducted by both of our countries in close cooperation.
- As in previous negotiation processes, we have shaped our constructive and proactive policies towards a solution with Türkiye. We continue cooperation with Türkiye to reach the desired outcomes.

GOVERNANCE

Upon any implementation of a settlement or peace agreement the Republic of Cyprus should cease to exist. A uniting of the Turkish Republic of Northern Cyprus and the Greek Cypriot side would create a single state. The "United Republic of Cyprus" should be formed by a "virgin birth" to operate as a new republic.

The first step in this re-unification process is the international recognition of the Turkish Republic of Northern Cyprus as the rightful home of Turkish Cypriots. As a politically equal states the island can then begin to work on reforms to join together. Together in harmony we propose to be one nation composed of two equal parts.

The current Republic of Cyprus is a Greek Cypriot creation. It does not meet the desires of the Turkish Cypriot community. To ensure our community has confidence in the new nation we must demonstrate that it is ours and not simply an annexation by the Greek Cypriot nation. If an independent nation at the birth of a new Cypriot republic cannot be achieved then seek recognition of the TRNC as a legitimate, independent entity lawfully representing the Turkish Cypriot peoples.

RED LINE: Any agreement for a system of government that disenfranchises our community in favor of a Greek Cypriot dominated government.

POWER SHARING

Federal versus State: Greek Cypriots insist on a federation-style government that favors a strong central government and weaker communal governments. This is a recipe for marginalizing the Turkish Cypriots. Having an equal voice is key to preventing the Greek Cypriots from oppressing our peoples.

We strongly advocate for a confederation with a small number of national offices as delegated by the stronger communal governments. This will allow each community to regulate and control their respective regions as their constituents see fit. National entities are still required for such things as banking, foreign service, and investigative services. Control over ports, customs, national guard, etc. should be retained by the individual confederated governments.

RED LINE: A strong federal system being implemented.

The Federal Executive: Negotiations have stalled in the past over the proposed structure and composition of the executive branch of a newly formed united nation. We advocate for a Senate-elected President and Vice-President from different communities and that they rotate between communities every 3 years. This assumes an even communal representation in the Senate and ensures that our community is fully represented. Greek Cypriots advocate for a popular vote system with the President and Vice-President being candidates on "one ticket".

We do not advocate for Greek Cypriots to control both the Presidency and Vice-Presidency at the same time. This would remove any checks in the executive branch and not properly represent the Turkish Cypriot community. The only solution to this is by utilizing an evenly divided Senate to select each office and rotated every term.

RED LINE: A popular vote for national elections which inherently bias in favor of the Greek Cypriot majority population.

SECURITY AND GUARANTEES

The Treaty of Alliance and the Treaty of Guarantee established a structure between the Guarantor Powers of Türkiye, Greece, and the United Kingdom for the common defense of the island. The

forces currently in place were never part of this treaty. The UN has proposed these treaties be replaced by a new treaty between a united Republic of Cyprus along with Türkiye and Greece. They prescribe a new set of mechanisms to address inter-communal issues where two communities cannot easily deal with them alone. This proposal has merit.

There is currently no external threat to our island. But we recognize, based on our history, that internal threats will always concern us. We reject any discussion on the formation of a standing national army. This would certainly be dominated by Greek Cypriots. Our vision to ensure security would be the formation of two national guard organizations. Each organized, populated, and commanded by each communal state.

Resist any discussion on the dissolution of the current treaties. Safeguards must continue to exist to reassure both communities. Try and take the lead on the UN proposal and work with the SRSG to develop a draft outline of a potential agreement. Ensure that Türkiye and Greece are included to help deal with current issues. Include the continued need for military intervention and expect the Greek Cypriots to oppose a continuation of military safeguards.

RED LINE: Abrogation of the current treaties is unacceptable without an acceptable replacement.

POPULATION

Our primary concern is proper representation of our brothers from Türkiye who have settled here since the creation of our republic. However, we have additional internal concerns regarding the disproportionate number of immigrants from Türkiye versus native Turkish Cypriots. The number of immigrants flowing in from the mainland has grown exponentially and now slightly exceeds the Turkish Cypriots. This fact places our native population as a minority, not only on the island, but also within our community. This is of concern that we will lose the character and uniqueness of what it is to be a Turkish Cypriot.

We publicly disagree with Greek Cypriots on who must be repatriated to Türkiye, given the internal circumstances noted above, we can acquiesce on larger numbers being considered. We do not align with the Turkish position that a large Turkish population in the TRNC is needed to enforce claims that the two communities are equals. They consistently play down our concerns in protecting native Turkish Cypriots.

Work to ensure the term "settler" be more tightly defined. We suggest the following criteria: 1. Resident on the island for over 15 years, 2. Has been formally accepted as a candidate for citizenship, 3. Owns property on Cyprus, and 4. Has no criminal record. Offer a community-wide census conducted and compiled by our government. This is the only acceptable option.

RED LINE: Any census conducted by an outside party and not enumerated by our government.

CONFIDENCE BUILDING MEASURES

Confidence building must be a continuous process along with the other issues listed above. Expect the leading advocates to be the United States and United Kingdom.

Direct Trade Regulation and Turkish EU Accession

With the 2004 accession of the republic into the European Union the European Commission approved a Direct Trade Regulation (DTR) that would have allowed our citizens the privilege of direct export to EU member states at reduced customs rates. The Greek Cypriots immediately blocked implementation of the DTR by successfully arguing that the regulation required the consensus of all member states. They additionally argued that trade between EU members and the TRNC legitimized our republic. Türkiye's refused to implement provisions in the Ankara Protocol it had signed in 2005 in response. The Greek Cypriots subsequently blocked Türkiye's accession into the EU.

Varosha, Famagusta Port and Ercan Airport

Greek Cypriots value Varosha and have longed for its return to their control. The suburban coastal area was developed into one of the most attractive tourist locations in the Mediterranean. Since the division on our island this area fell into disrepair. After many years not developing this region, we have begun recently to slowly open it up for renewal.

We have made repeated proposals regarding resettlement and redevelopment by Greek Cypriots under generous terms while maintaining it as part of our community and state. All these offers have been rejected by the Greek Cypriots.

With the reopening of the beach in 2020 we have had nearly a half-million visitors vacation in Varosha. We could not wait for reunification to begin developing this prime area for commercial use. It has sat too long as a vacant eyesore and we have taken steps to reclaim it from further disrepair.

In order to enjoy the "Four Freedoms" of the EU, uninhibited movement of goods, services, labor, and capital, this must be dealt with. Work with the Greek Cypriots to execute small steps toward a larger agreement to remove blocks from preventing Türkiye's accession and implementation of the DTR. Persuade the United Kingdom and the United States to pressure the Greek Cypriots and Greece to allow Famagusta to open for trade under EU, or UN, supervision in exchange for Ankara implementing positions on the Ankara Protocol. This will allow some Greek Cypriot trade with Türkiye and help ease economic difficulties within the TRNC.

Ercan Airport is located within the TRNC. It is our only viable airport for entry into our republic. Greek Cypriots have successfully sought a ban on all direct international flights. They demonstrated this fact when a single flight from Baku, Azerbaijan arrived in 2005 and they pressured the carrier to never conduct this flight again. Do not let the Greek Cypriots not recognize Ercan as a legitimate port of entry with our control of passports, visas, customs, and trade. They view allowing this type of administration of the airport as de facto international recognition and legitimization of the TRNC.

Note: The United States Government does not recognize the "Turkish Republic of Northern Cyprus." Usage of the terms "Turkish Republic of Northern Cyprus" and "TRNC" in this exercise, being administered by the United States Army War College, is used for educational purposes only and does not reflect a contradiction to the United States Government official stance.
